

A metal delight

WE haven't seen much of the sculpture of George Jaholkowski, the Cape Town artist for some time, but in a group exhibition by Cape Town artists now in a city gallery there is a delightful piece of metal sculpture, "Galletto," by this artist. This is the

subject of today's picture.

Semi-abstract and yet splendidly realistic there is an excellent fluidity in this work. The subject has been well observed and translated in economic but faithful line. In particular, note the movement in the legs and the swirl of the tail feathers. **H.E.W.**
